ANNUAL REPORT OF MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules as promulgated under the Utah Minerals Regulatory Program. An operator conducting mining operations under a Notice of Intention must file an annual operations and progress report (FORM MR-AR) with the Division.

I. General Information

1. Report Time Period: From (mo./yr.) January 1 2002 To (mo./yr.) December 31 2003
2. DOGM File Number (Mine No): S /450 /058
3. Mine Name: Falenia Mine
4. Mineral(s) Mined (or permitted to mine): Clay
5. Type of mine: ☒ Surface Mine or ☐ Underground Mine
6. Legal Description (Location of Lands Affected):
1/4, 1/4, 1/4, Section 17, Township 2S, Range 6W
1/4, 1/4, 1/4, Section, Township, Range
1/4, 1/4, 1/4, Section, Township, Range
7. Name of Operator or Company: Interstate Brick
8. Permanent Street Address: 9780 South, 5200 West
City, State, Zip: West Jordan, Utah 84088
Phone: 801-280-5200 Fax: 801-280-5225
9. Company Representative (or designated operator):
Name: John Hewitt
Title: Assistant Plant Mgr.
Business Address: 9780 South 5200 West
City, State, Zip: West Jordan, UT 84088
Phone: 801-280-5230 Fax: 801-282-5321
☒ Please check if any of the above information has changed since previous year.

II. Mining and Reclamation

1. Was there any mine related activity during the past year? Yes No ☒
2. If no - what was the last year of activity? 1999 or 2000
3. If yes - how much ore or mineral was mined? No more than the exploration quantity

RECEIVED

FEB 03 2003

DIV. OF OIL, GAS & MINING

4. Briefly describe the type of work performed, volume of material moved, and any new or additional surface disturbances that occurred during the past year.
No activity has taken place at this location because it was discovered that the mining rights of this property belongs to Lonestar Cement. There was an error made when determining the owner of the mineral rights of this property at the time a mine plan was submitted. There is a small pile of material on sight believed to be from exploration (but some could be from the old mining operation). Interstate's plan called for extending work along a previous cut. Subsequent inquiries by Interstate Brick to Lonestar Cement have not resulted in an agreement to let Interstate mine the clay.
5. How much **additional acreage** was disturbed during the past year? none
6. How much acreage was **reclaimed** during the past year? none
7. Briefly describe the reclamation work performed during the past year. This description should include methods employed, and an evaluation of the results.
none
8. What is the **total disturbed acreage of entire project** at years end? Estimated to be 1 acre or less.
9. Briefly summarize any mining and/or reclamation plans for the upcoming year.
There are no current plans for any activity at the present time. Interstate would like to pursue mining the area, but this would depend on permission granted by the mineral right owner and/or surface owner. At this time Interstate would like to request that the status of this mine be changed to inactive, but would like to maintain the permit in case circumstances change and Interstate would be granted permission to mine the clay

NOTE: Section III., "Additional Information" applies only to **large mining operations**.

III. Additional Information - R647-4-121.2 and .3

1. **The operator shall include an updated map depicting surface disturbance and reclamation performed during the year**, prepared in accordance with Rule R647-4-105.
2. The operator shall keep and maintain timely records relating to his performance under the Act, and shall make these records available to the Division upon request.

IV. Signature Requirement

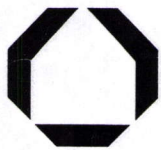

I hereby certify that the foregoing is true and correct.

Name (Typed or Print): John Hewitt

Title of Operator: Assistant Plant Mgr.

Signature of Operator: 

Date: 2-3-03

Mr. D. Wayne Hedberg
Permit Supervisor
Minerals Reclamation Program
Utah Department of Natural Resources
Division of Oil, Gas and Mining

Subject: Annual Report of mining reports for 2002.

Dear Mr. Hedberg:

Please find enclosed 10 annual reports of mining activity. In addition to these reports Interstate Brick would like to request the following changes.

The Falenia Mine, S450058, has a status of "active". This should be classified as "inactive". No mining past the exploratory work took place at this location because it was later found out that the mineral and or surface rights belonged to Lonestar Corporation. If possible, we would like to keep the permit and mine plan in case they decide they would like to let us have the clay under some sort of agreement.

We request that the status of the Allred/Clinton Mine, S490029, be changed to "active". Interstate Brick this year recently entered into a new 30 year lease agreement with the surface and mineral right owners, the Allred family. After the agreement mining did resume after a pause of several years in August of 2002.

DIV. OF OIL, GAS & MINING

Within the past 5 years, the Powell Mine, located in the Saratoga Springs Quadrangle just ^{West} ~~East~~ of Utah Lake, began to be turned over to Peck Rock Products, Interstate's clay mining and hauling contractor. The State Trust Lands lease for an old pit was given up and the Pecks began a new lease to use the pit as a construction waste dump. There also was some land sold to the Pecks adjacent to a clay seam still being mined. At the time the plan was for Interstate brick to eventually let go of all its interests in the entire area including the clay still out there. Interstate has subsequently decided to keep control of the lease for the clay mine and does not intend to give up it's interest in the clay (referred to as "Powell Pink" clay). We work closely with the Pecks and currently will reimburse them for the annual reclamation bond costs pertaining to the clay mine since the actual mine permit was transferred to them. The Peck's have requested from Trust Land's permission to conduct a gravel operation. We intend to allow that only so long as any processing of gravel is stripped off the clay seam and does not exceed the scope of the mining of clay or deviate away from areas Interstate feels is most suitable for mining.

Sincerely,

John Hewitt

Interstate Brick
